**Part III DETAILED ACTION**

1. This application is a continuation of PCT/GB98/01833.
2. The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 1644.
3. Claims 1-39 are pending.
4. Applicant's election of Group III, claim 39 in Paper No. 8 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).  
Accordingly, claims 1-38 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to non-elected inventions.
5. Applicant is notified that IDS references 5 and 6, received on March 23, 2000, were not considered because the entire reference in English was not submitted.
6. This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 C.F.R. § 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 C.F.R. §§ 1.821-1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures.

**Claim Rejections - 35 USC § 102**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 39 is rejected under 35 U.S.C. § 102(b) as being anticipated by Peeters et al. (7, on the IDS).

Peeters et al., teaches a polypeptide immunogen capable of when conjugated to a carrier of inducing antibodies in an immunized subject that recognize epitopes of Angiotensin I (see Fig 3, Materials and Methods and page 142, 1st column, 2nd full paragraph,

Art Unit: 1644

in particular).

The prior art teachings anticipate the claimed invention.

8. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicants cooperation is requested in correcting any errors of which applicant may become aware of in the specification.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick Nolan whose telephone number is (703) 305-1987. The examiner can normally be reached on Monday through Friday from 8:30 am to 4:30 pm.
